

LIQUID ICE MELT (Pre-Treatment)

APPLICATION GUIDE

APPLY BEFORE SNOW AND ICE

- 1 PREPARE**
Shovel away any accumulated snow and ice. Liquid Ice Melt works best when applied to a dry surface.
- 2 DO NOT DILUTE**
Liquid Ice Melt is ready to use. Use a pressure sprayer for fast, even application (avoid misting or fan nozzles). Gloves and eye protection is recommended.
- 3 SPRAY EVENLY**
Apply Liquid Ice Melt evenly before snow, sleet, or freezing rain. **Avoid puddling or pooling.**

TIPS FOR BEST RESULTS

AVOID PUDDLING

More product isn't always better.

APPLICATION

Reapply every 3–5 days, or before snowfall

SURFACES TO AVOID

- Natural stone (limestone, marble, travertine, slate)
- Unsealed or bare wood
- Metal grates, drain covers, metal stair treads
- Any newly poured concrete (under 12 months cured).

PRODUCT COVERAGE

1 GALLON (3.78 L)

One 10ft² doorstep can be treated about 100 times

The surface may remain wet for approximately 20 minutes to 1 hour depending on conditions.
